

Streamline Your Construction Finances

Optimize Project Management With Advanced Automation Tools

MX™ Build is a construction-centric finance automation platform for general contractors, sub-contractors, and service providers in commercial and residential construction. MX™ Build was designed to streamline and enhance financial management for construction businesses. Built on robust payment and banking infrastructure, it adds features to:

- Mitigate risk
- Automate compliance
- Simplify stakeholder collaboration
- Increase visibility for better decision-making

Key product features:

- **Project Profitability:** A report that helps you focus on the projects that drive profit.
- **Smart Pay:** Automate AP payments (Check, ACH, Virtual Card) with built-in compliance.
- **MX™ Build Card:** A Purchase Card for construction projects that simplifies expense tracking and offers 30-day credit terms (subject to approval).
- **Project Accounts:** Detailed financial tracking for construction projects, ensuring accurate budgets and real-time cost visibility.
- **AR Platform:** Automates payment tracking and collection, boosting cash flow and reducing admin work.
- **AP Automation:** Streamlines accounts payable with automated invoice capture, approvals, and payments.
- **AI Transaction Classification:** Automatically categorizes transactions by project and category.
